JASMINE SPA

Lark SPA Module

A unique and innovative offer of SPA houses - a perfectly composed leisure module for private individuals and hospitality companies. Excellent solutions that provide relaxation and achieve a true harmony of body and mind in complete harmony with nature. The beneficial effect of the waters in a project developed to refine the senses and in an arrangement ensuring relaxation.

As the only manufacturer in the world, we offer independent leisure and relaxation SPA modules, equipped with sauna, whirlpool, bath and optional terrace - an ideal complement to the camping or the home garden. Highest quality and longevity of construction and finishing materials, first-class equipment and bathtubs, perfectly modern, minimalist design.

3

Siding

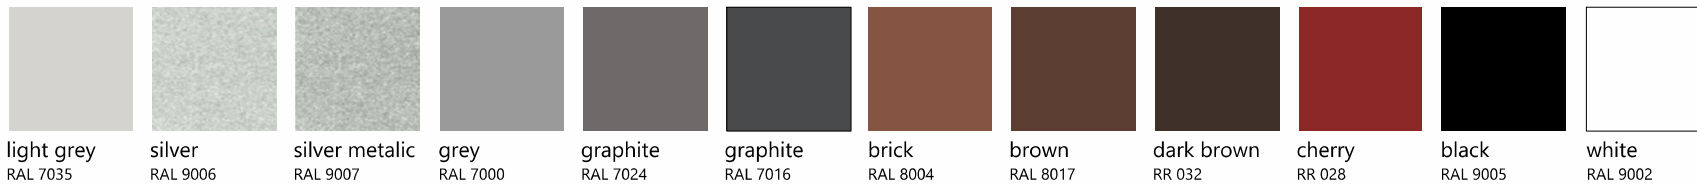

The siding used combines materials and composites, which increases its aesthetic and functional values. This extremely durable material is resistant to changing weather conditions and does not require regular maintenance, does not fade and does not change shape under the influence of sun rays or temperature. Natural wood adds nobility and increases the aesthetic value of the SPA making it fit perfectly into any landscape.

-  Pest resistant
-  Easy to Clean
-  Windproofness
-  Ventilation of the facade
-  No painting and maintenance required
-  Moisture resistant
-  Lightness that facilitates installation and does not load the structure

Roof

Be it a flat or gable roof, our roofs are covered with high quality roofing ensuring durability and comfort of use as well as the highest aesthetic standards.

Boiler room

The Ariston electric heater is a smart device with a double water tank.

Anti-Legionella Legion

Once a month, the water temperature rises automatically above 65C to eliminate bacteria and ensure water hygiene.

Self-Diagnosis

In the event of a fault, an error code is displayed on the display to easily find the cause.

Protection Against Starting "Dry"

In the event of a leak or lack of water in the device, it turns off the heater to prevent it from burning out.

The function of active electrical protection.

After finishing the heating process, the heater is completely disconnected from the power supply to guarantee maximum safety.

SMART touch panel Blue-Tech

An intelligent and intuitive display for easy temperature managements with information on water preparation for the first shower.

External accessories

Walls and floor

The walls and floor are made of high quality, waterproof HPL board, which thanks to its properties will allow to maintain a fresh and new look for a long time. In addition, covering the floor with a non-slip layer will provide the maximum safety to users.

- resistant to abrasion
- impact resistant
- hygienic
- resistant to scratches
- antibacterial
- resistant to high temperature

HPL boards are very easy to keep clean. As a rule wiping them with a soft cloth and warm water is enough. If necessary, cleaners can be used.

Heater

Towel radiator not only provides thermal comfort but also has a decorative function and can be used as a towel and clothes hanger.

Additional accessories

- mirror
- HiFi
- TV
- furniture

Jasmine
Wellness & SPA
Lark Mobile Homes

Sauna

Walls and ceiling covered with polished alder wood (14x121 mm) with a special profile for softline type saunas.

The boards will be arranged horizontally. Only selected homogeneous wood of the highest quality in the A + class is used to assemble our saunas.

Benches are made of knotless alder wood in A + class.

Ventilation in the cabin is carried out by gravity.

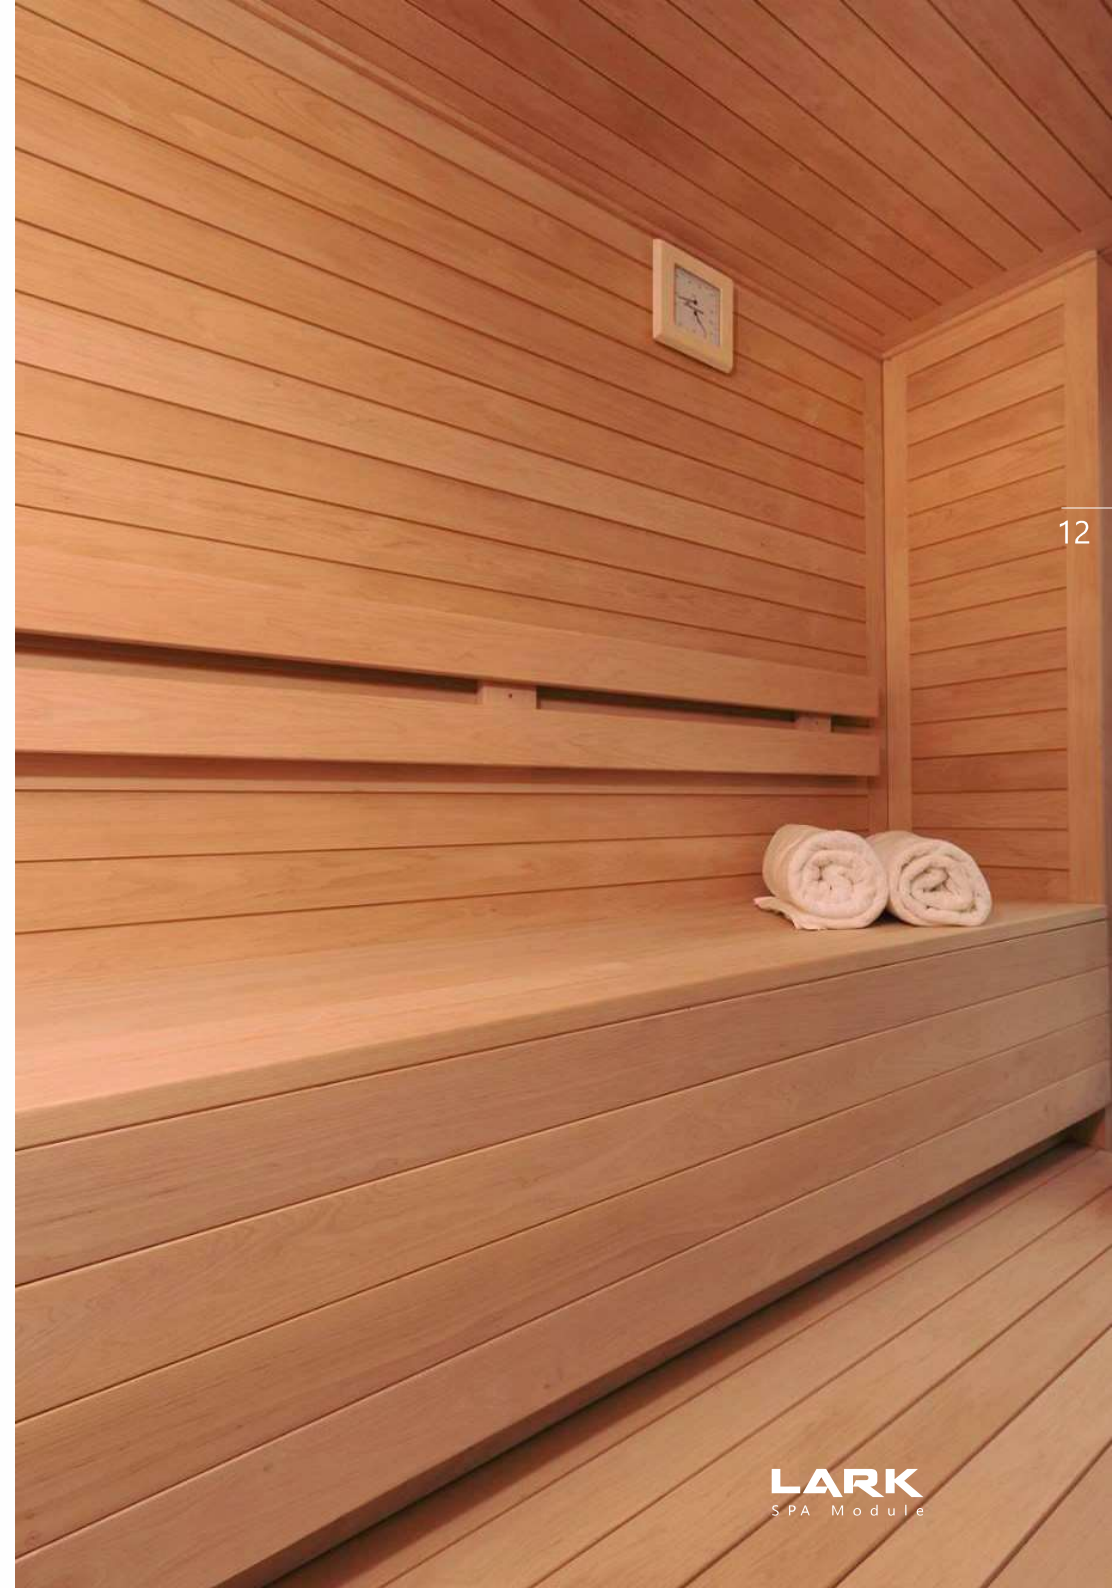

Appropriately placed cold air intake (under the sauna door or in the wall under the stove) and properly located outlet (in the wall or sauna ceiling) allows for efficient air exchange in the cabin.

EQUIPMENT

- hygrometer, hourglass, thermometer, bucket and ladle
- platform
- catch and lighting benches
- speakers

Furnace manufactured in Germany by the company EOS Euromax 12 KW model EOS microprocessor controller with basic functions regulating sauna temperature, working time and lighting

Bathtub

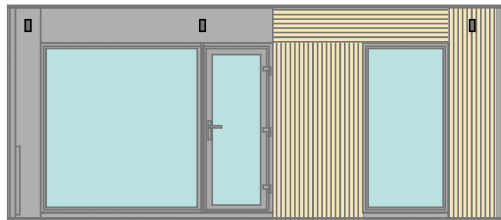

The Wellis Manhattan Bathtub has been equipped with a modern and popular body massage system for 2 persons. A total of 28 water-air nozzles in combination with a powerful 3HP pump, as well as aromatherapy and relaxing LED lighting will certainly neutralize tension and stress. The more demanding user will find relief thanks to his/her favorite music flowing from the built-in speakers. Manhattan 2018 has three fountains that enhance the relaxation experience.

About us

For many years, we have been a leading producer of high-quality mobile homes in timber-framed technology. Due to the high quality of the products we offer, we have become the main Exporter of mobile homes to the Central and Western Europe. At this moment, Lark Leisure Homes - Mobile Homes Factory supplies hundreds of campsites and learns about their needs and requirements.

This is why the idea for the production of sanitary modules appeared, which will in no doubt adapt to the high standards of campsites and the expectations of the customers of tourist facilities across Europe.
